

TM Livinroof

By Ultraframe

Grey insulated panels

Grey aluminium insulated panels provide a U-Value of 0.16 and reduce heating bills

Profile

Strong 'wineglass' bars engineered to withstand extreme weather conditions for your postcode.

Glazing stops

Robust glazing supports prevent glass slippage

Jack rafters

Wind resistant jack rafters – tested in 120mph winds

Cornice

A grey curved cornice adds style and shape to the roofline, hiding gutters too

Hub

Weathering hub offers ultimate protection from wind and rain – no leaks

Speedlock

Patented Speedlock ensures bars are secured and glazing is weathertight

Shaped glazing

Shaped glazing panels give plenty of natural light, just where you need it

Top-caps

Thermally isolated aluminium top-caps provides maximum security and thermal efficiency. Available in grey.

Twinbolts

Twinbolts deliver super-strong structural joints

Columns

Optional super-insulated columns

Pelmet

An integrated internal pelmet lifts the ceiling and insulates the perimeter. A useful places for spotlights or speakers.

Livinroof has approval from the LABC to make Building Regulations easy.
