## ANTI-VIRAL Door Handle

Our new anti-viral handle has an antimicrobial surface. Its high level of hygienic safety has been confirmed in independent laboratory and practical tests.

The coating on the handle contains silver ions that prevent the growth of germs.

The silver destroys the cell membrane of the germs and therefore blocks cell respiration and cell ingestion. Cell division stops; the germ dies.

Independent tests have shown that the ion coating reduces the growth of germs in this way by more than 99% - even with regular cleaning, and it requires no maintenance.

1. High bacterial load on the surface

2. Silver ions destroy the cell membrane of the germ

3. Germ is killed

4. There is a significant reduction in the bacterial load on the surface
